

M. Jeanne Wilcox, Ph.D.

Director ICRP
Professor, Department of Speech and Hearing Science

Dr. Jeanne Wilcox is a Professor of Speech and Hearing Science at Arizona State University in Tempe, Arizona. She has established, and directs the Infant Child Research Laboratory Programs at Arizona State University, a facility that provides early intervention and instructional services to families and their infants, preschoolers, and primary-aged children. It also functions as a training site for interdisciplinary graduate students. Dr. Wilcox is recognized for her expertise and scholarly activity with regard to early communication and language development and promoting language and literacy in early childhood classroom environments. She has an extensive record of published articles, instructional protocols, instructional manuals, books, and book chapters and has been invited speaker at numerous state, national, and international meetings and conferences.
