ASU Arizona State University Composts!

We want your waste!

Composting keeps waste from landfills and provides a useful fertilizer for plants.

Please save your items that can be composted and drop them off at the point designated on the map.

Do save:
- fruit/vegetable waste
- coffee grounds/filters/tea bags
- shredded newspapers
- shredded paper (cross-cut preferred)
- eaves/grass clippings
- egg shells

Don't save:
- meat/dairy products
- fats/oils
- anything treated with chemicals

GROW ASU will use these composted materials to enrich the soil of our organic vegetable garden.

Please contact wesley.j.james@asu.edu for more information or if you're interested in volunteering to help compost ASU waste.
