

STUDENT CAREER EXPERIENCE PROGRAM

ENVIRONMENTAL PROTECTION AGENCY ENVIRONMENTAL PROTECTION SPECIALIST TRAINEE

Everyday is Earth Day at EPA! Working at EPA is more than just a career—it's serving your country by helping to protect human health and promote a cleaner, healthier environment.

Are you interested in exploring a career with the EPA and the Federal Government but don't know how to navigate the red tape? Participating in the Student Career Experience Program (SCEP) at EPA can give you the edge you need to get your foot in the door. SCEP provides students with paid part-time, semester-length, seasonal, or summer trainee employment in a position complimenting their academic studies. Upon successful completion of at least 640 hours of work and receipt of their degree, participants receive non-competitive eligibility for appointment to the Federal service for the type of position they trained for. Positions are available in the following program offices:

Office of Prevention, Pesticides, and Toxic Substances: OPPTS regulates pesticides and chemicals to ensure protection of public health and the environment, as well as promotes innovative programs to prevent pollution.

Office of Enforcement and Compliance Assurance: OECA enforces US environmental laws while inspiring the regulated community to pursue pollution prevention.

Office of the Chief Financial Officer: OCFO provides Agency financial services, manages EPA's strategic planning process, formulates and manages the Agency's budget and develops and maintains EPA's financial systems.

Office of Environmental Information: OEI facilitates data collection, management and access to assist in raising awareness of environmental issues and improve environmental decision-making.

Environmental Protection Specialist trainees conduct outreach to the regulated community and develop and implement EPA programs that determine compliance with environmental laws and regulations or programs that seek to assist industry and government to avoid generating pollution. They also investigate and bring civil enforcement cases against violators. They analyze environmental policies and regulations and work with states to implement a variety of pollution prevention programs. They may assist in making more efficient EPA business practices through automation. Strong writing and analytical skills are required. All positions are located in Washington, DC. **All majors are welcome to apply, but applicants should have some academic or experiential background in environmental issues.**

Specific Job Information:

Locations: Washington, DC

Salary: Federal Government GS-4 (\$13.60/hr. undergraduate) or GS-7 (\$18.85/hr. – master's candidate)

Schedule: Flexible, depending on student's needs. Positions are available at any time during the year.

Position Benefits:

- Benefits include annual and sick leave, transit subsidy, health insurance, and retirement.
- Students gain on-the-job training and experience and preview a career choice
- Upon graduation and successful completion of the work requirement, students gain non-competitive eligibility for appointment to the Federal service in the target position.

Qualifications Required:

- U.S. Citizen
- Enrolled at least half-time in a degree-granting program at an accredited college or university
- At least a 2.95 GPA on a 4.0 scale
- Recommended by university faculty
- Basic background investigation
