1. Although a course may satisfy a core area requirement and an awareness area requirement concurrently, a course may **not** be used to satisfy requirements in two core areas simultaneously. A course may satisfy two awareness areas concurrently.
2. When selecting HU or SB core courses, students must keep in mind that A. two courses in one of these two core areas must be in the same department; B. courses from at least two departments must be taken. These two conditions may, but need not, be satisfied in the same core area.
3. At least one course within the 15 semester hours **must** be an upper-division course taken only at ASU.
4. It is beneficial for students to select core area requirements that concurrently satisfy an awareness area.
