February 15, 2016

ADDENDUM 3

REQUEST FOR QUALIFICATIONS NO. 161602

UTILITY SAVING PROJECTS & INITIATIVES

Total pages in this addendum: One (1)

Please note the following questions were asked prior to the deadline for inquiries date of 2/12/16 at 5:00 P.M., MST.

1. Q. Can we self-perform the mechanical portions of the scope?
   A. Yes, if you are fully qualified to perform the functions outlined in the scope.

2. Q. If we self-perform, do we need two additional quotes?
   A. Based on Procurement guidelines, you may need additional quotes.

3. Q. We are proposing savings on the ROI for Burner and controls retrofit for ASU’s large industrial boilers. By evaluating each boiler & taking measurements, we are able to calculate, engineer and retrofit each system and show large savings on natural gas usage in turn usually less than five year ROI.
   A. The intent of the RFQ is to find a General Contractor (GC) who has the ability to manage projects and sub-contractors in order to implement energy savings projects.

4. Q. How can we access the existing boilers to view current equipment so that we can propose the upgrades.
   A. The intent of the RFQ is to find a General Contractor (GC) who has the ability to manage projects and sub-contractors in order to implement energy savings projects.

All other specifications, terms and conditions of the solicitation shall remain unchanged.

NOTE: Please acknowledge your firms’ receipt of this addendum in your bid on the Addendum Acknowledgement form.
