

New or Established Researcher Safety Orientation

We invite you to join us for our New or Established Researcher Safety Orientation. Attending this one hour orientation is beneficial to new or established principal investigators, lab managers, and academic professionals interested in streamlining the safe start up or maintenance of a research laboratory and/or field research operations.

This energized informal event assists researchers with initial laboratory setup, hazardous waste management practices, and the development of safety procedures. We constantly update the agenda to keep you up-to-date with the latest facts and information on current ASU policies as well as other regulatory agency mandates regarding research areas. We provide you with an opportunity to meet with both the Environmental Health & Safety (EH&S) and the Office of Vice President for Research and Economic Affairs (OVPREA) professionals who assist with research policy and regulation compliance.

Please contact EH&S with questions or to reserve your place at the next session.

Look forward to sharing our experience with you,

EH&S and OVPREA
