Arizona’s Children — Arizona’s Future: Perspectives on Education, Health, and Diversity

presented by the ASU Community Fellows in partnership with General Dynamics C4 Systems

panel discussion sponsored by the School of Extended Education, University College at ASU and Morrison Institute for Public Policy

What are the most challenging issues facing Arizona’s children today? Education, health, and the demands of increasing diversity are three that stand out. What is the best thinking in these areas? Are there any promising new solutions?

Come listen and respond as ASU’s Community Fellows dip into their wealth of experiences with children’s issues and share their perspectives on educational attainment, child abuse, the cycle of violence, and the changing ethnic makeup of student populations. Learn how a positive focus on Arizona’s children can increase their options for secure and successful futures, and also benefit the community at large.

About the ASU Community Fellows Program

The ASU Community Fellows Program, in partnership with General Dynamics C4 Systems, serves as a catalyst to foster partnerships and facilitate mutual learning experiences among the neighborhood, university, and business interests seeking to improve the quality of life valleywide.
