The General BS can be (and should be) tailored to the specific interests & needs of the students. Students seeking the B.S. degree need to take the required core of 8 classes, but the remaining courses (12 hrs) of Geography electives and 9-12 hrs of Geography or related fields of study are tailored to the specific interests & needs of the student.

For example, a student interested in Natural Resources may wish to tailor the remain of his/her studies to that subject by taking courses such as GPH481, GPH405, GPH481 or GCU 474

Talk to the Geography Undergraduate Advisor for details and suggestions for tailoring the basic BS degree to your specific interest or topic

* MAT119 or higher prerequisite

** GCU495,GPH371 & GPH491 prereqs
