ORDERING CHEMICALS

Order your chemicals through SunRISE. This is the fastest, most accurate method to order chemicals, and SunRISE offers University contract pricing.

Because of shipping costs and HAZMAT fees, we recommend you using the ASU Chemistry Stockroom for ordering solvents to obtain the best price.

If a chemical is not in SunRISE, or if the supplier does not support overnight shipping through SunRISE (see warning message below) then we suggest you place your order directly with the supplier using a Purchasing Card (preferred) or Departmental Limited Value Purchase Order, PDLVPO. Then e-mail or fax a copy of the order or packing slip, after receipt of the order, that shows what was ordered and to where it was delivered to:

Dorothy.Haskett@asu.edu or fax: 480-965-0736

This process will ensure that the University is able to track chemicals without adversely impacting your research and instruction.

SunRISE Helpline is 480-727-RISE (7473)

Warning message if supplier does not support Standard Overnight Shipping
