Relationship-based Practice in Early Intervention

M. Jeanne Wilcox
Carolyn A. Weber

Infant Child Research Programs
Arizona State University
Tempe, Arizona
GOAL OF THE MODEL

- To facilitate optimal parent-child interactions by focusing on individualized parent-professional relationships as the practitioner mirrors the attributes and attitudes that need to fostered between parent and child.
- Reflects the current initiative to implement services that are family-centered and strengths-based.
TWO KEY QUESTIONS

• How do we support positive caregiver-child relationships?
• What skills and strategies are important for early intervention personnel to possess?
ABILITIES THAT ARE EMPHASIZED IN THIS MODEL

• The ability to observe ecologically.
• The ability to form a therapeutic alliance with the family on behalf of the child.
• The ability to be aware of your own values/attitudes and the impact of your interactions with a family.
• The ability to be reflective and strengths-based.
• The ability to contract and clarify.
