

**EDP310: Emotional Intelligence, mini-project:  
REVIEW OF RESEARCH LITERATURE**

Please select one of the two articles provided to read and review in completion of this article review. After thoroughly reading the article you have chosen from the two articles provided, please complete the questions below. Please number/letter all responses in your “mini-project” document.

1) Citation

Provide citation in APA format (3 points)

2) Introduction

- a) What is the research question the researchers hope to address through this study?
- b) Briefly state the hypothesis(es).

3) Method Section

- a) What model of EI is being utilized in this investigation? Describe this model.
- b) What is a general description of the methods used to study the research question? What assessment (instrument) is being applied? And, to whom?

4) Results Section

**Discuss** the major results of the study?

5) Conclusions

- a) What did the researcher(s) conclude about their study? Did they confirm their research question?
- b) Do the researcher(s) make suggestions for future research? Is so, what do they suggest?

6) What are your thoughts on this research? How does this research apply to your life?

**\*Again, please remember to number & letter all responses in your “mini-project”, such that it is clear the specific prompts your writing is addressing. All responses are to be written in paragraph form, e.g., no “bullet points”, please.**

*As always, professionalism of product: inclusive of proper grammar & syntax, appropriate word count, and accuracy of spelling. Please number/letter each response so that it is clear which instructional prompt you are addressing in your document.*
