

# Eye Promise

Eye Promise to work safely with harmful materials.

## The Eye Promise campaign has five promises to reinforce ASU's culture of safety:

1. **Always** wear eye protection when working with or near hazardous materials and physical hazards.
2. **Always** wear eye protection even if using prescription glasses or contacts.
3. **Always** remind others to wear their eye protection near hazardous materials.
4. **Always** know the location of the nearest eyewash station, how to operate it and never block its access.
5. **Always** report accidents and injuries.

Use all required **personal protective equipment** while working with harmful materials or physical hazards. If glasses are cracked, scratched or otherwise no longer safe, dispose of them properly and use new protective eyewear.

Decorated safety glasses must meet or exceed **ANSI Z87.1** for use in a hazardous area.\* **Please personalize your protective eyewear responsibly.**

## Environmental Health and Safety

**Fact:** According to the National Institute for Occupational Safety and Health, U.S. workers suffer about 2,000 eye injuries each year with one-third resulting in a trip to the hospital and 100 resulting in at least one missed day of work.

\***ANSI Z87.1** prescribes the design, performance specifications and marking of safety eye and face products and is incorporated into OSHA regulations.
