

Certificate of Hazard Assessment | Personal Protective Equipment | Glass crusher

All managers and supervisors must survey the work areas and activities under their control to determine where Personal Protective Equipment (PPE) may be required.

Instructions

Identify the workplace location. Conduct a walkthrough survey of the workplace and list the tasks or job functions that require personal protective equipment or PPE. Ensure PPE has an acceptable ANSI rating based on the chart provided on the back of this sheet. Conduct interviews with employees while performing field observations when necessary and complete this form. Sign and date this certificate. The completed certificate should remain on file in your area and additional areas required by your department.

Please note:

When determining if a potential hazard exists, consideration should be given to the following:

- History of injuries or illnesses related to the workplace or job.
- History of employee complaints or concerns.
- Employee’s perception of hazards.

Task	Potential hazard	PPE required
Handling glass bottles, porcelain, quartz material	Hand injuries, chemical contact	Safety goggles, chemical-resistant apron, safety shoes and work gloves.
