Many ASU employees stack boxes in work areas to conserve space.

When stacking boxes, remember that safety is paramount.
What to look for

- Ensure that stacked boxes are at least 18 inches away from a sprinkler deflector, shown at right.
What to look for

- Ensure boxes are at least two feet from a ceiling without a fire sprinkler.
Details

Identify areas where boxes may be stacked improperly:

• laboratories
• offices
• shops

Consult with the area managers to address safety concerns and resolve box stacking hazards.
