

Reusables

Facts about containers:

When you use your reusable to-go container at each meal, you **prevent 8.4 pounds of waste** each week from going to the landfill.

*based on 3 meals a day usage.

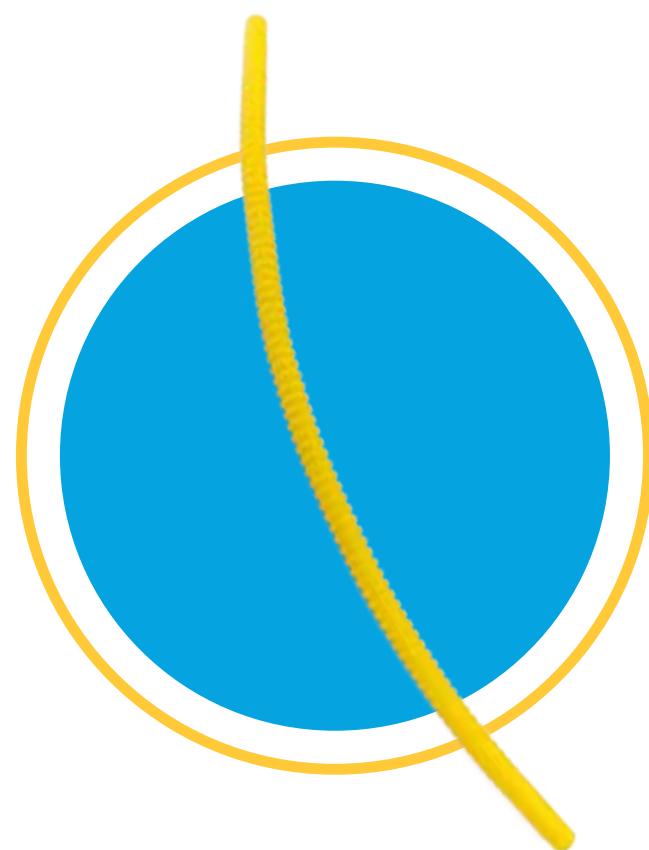

Also, try these:

Bottle

Utensil

Straw

Humankind's economic system is designed around a linear path of extraction, processing, manufacturing, consumption and disposal. Nature does not use this process. Instead, nature's process is circular.

By switching to reusables, you are actively helping to **reduce waste** and improve **re-circulation** at ASU!
