

Sustainable swag

Prioritizing sustainability in event giveaways is a powerful way to be better stewards of the environment and reduce waste.

The following is a sample list of items that meet ASU's sustainable purchasing guidelines. Items with any ASU or department logo must be ordered from ASU's approved vendors and preferred suppliers and approved by the Trademark Licensing office.

Produce mesh tote

This 3-in-1 tote made from recycled water bottles allows you to transport, wash and dry your produce without removing it from the bag.

T-shirt

100% cotton T-shirts are produced in a factory that is compliant with environmental regulations and close to campus, helping to reduce shipping emissions.

Bento box

This food storage container made from bamboo and glass is a smart alternative to disposable plates.

Fanny pack

This product uses cellulose plant fiber, which is 100% recyclable and starts decomposing within two weeks of being placed in the ground.

Printed salad shaker set

The shaker set is made with 100% recycled polypropylene.

Reusable notebook

Rocketbooks are reusable, recyclable and made from partially recycled materials.

Foldable shopper tote bags

This reusable tote made with 20% recycled plastic water bottles is valuable for any store trip.

Travel cutlery set in zip pouch

Keep eco-friendly utensils on hand instead of using disposables.
