Advantage 2.0 (GUI) Installation and Setup Instructions

Pre-installation Requirements

1. Ensure that Cisco AnyConnect Security Mobility Client VPN version 6073 or later is installed on the computer. This software can be downloaded from https://sslvpn.asu.edu/ (preferred) or from https://myapps.asu.edu.

2. Ensure that the potential user can authenticate through the Cisco AnyConnect Security Mobility Client VPN firewall.

3. Ensure that the user has a RACF/CICS ID and password. This is attained when Advantage access is originally granted.

Note: This application will only function on Windows 32 bit operating systems. If the Windows operating system is 64 bit this installation will not work.

Installation Instructions

1. Locate and double-click on the adv4_12_02.EXE file.

2. Advantage Desktop 2.0 installation window appears. Ensure that the date located in the upper left-hand corner of the screen reads April 12, 2002.

3. During installation accept all default settings by clicking Next. Accept all defaults as indicated in the following screenshots:
4. Installation will commence as indicated by the % completion box located in the lower right-hand corner of the screen. Please wait until 100% completion is reached.

5. When the Installation Complete Window appears, click on OK.

6. Reboot your computer by choosing Yes when prompted.
7. Install the Advantage Win 2000 XP patch by running the program and clicking install as in the following screenshot (note that this patch is also required for Windows 7, 32-bit installations):

![Screenshot of the Advantage Patch for Windows 2000 installation](image1)

Click Install to continue with the installation.

8. Run the AdvUpdate07 patch. Accept all defaults as indicated in the following screenshots:

![Screenshot of the AdvUpdate07 Setup Wizard](image2)

The Setup Wizard will install Advantage Update 2007 on your computer. Click Next to continue or Cancel to exit the Setup Wizard.
NOTE: If you have difficulty with the Advantage installation, contact James Nichols at 965-1929
Important items to note prior to profile setup:

In general, Advantage works best if the user is either a local admin or, barring that, at least has full control of the C:\ad folder created during install as indicated above.

The user attempting to login to Advantage must have Advantage VPN access. This is granted by Computer Accounts during account setup and is rarely an issue. It is being noted here so that tech support staff understand that their VPN access likely won’t get them to Advantage for testing purposes.

Profile Setup Instructions

1. Log into Cisco AnyConnect Mobility Client using ASURITE ID and password:

   ![Cisco AnyConnect Mobility Client](image)

2. Locate the Start Button, select Programs, click ADVANTAGE 2.0 then click Advantage Setup.

3. The Setup window will appear:
Click on the **Load Settings File** button.

4. When the window shown below appears, select `vpnp.ini` from the list and click **OK**:

![Select the INI File window](image)

5. The **Setup** window will appear:

![Setup window](image)

Click on the **Edit Comm Security Profile** button.
6. The **Desktop Security** window will appear:

![Desktop Security Window](image)

Type `vpnp` in the **User ID** field and again in the **Password** field. Click **OK**.

7. In the following window, ensure that **FIN_TCPIP** is selected and click **OK**:

![Select Comm Section Window](image)

8. The **Edit Comm Security Profile** window will appear:

![Edit Comm Security Profile](image)

Enter your **RACF/CICS user ID** in the **User ID** field, and your **RACF/CICS password** in the **Password** field.

Click **Apply**, then **OK**.
9. The Setup window will appear:

Click on the word Security in the menu bar and choose Save Profile.

Click on the word File in the menu bar and choose Exit.

**NOTE:** Follow Set-Up instructions for resetting CICS Password every 90 days.

**NOTE:** If you have difficulty with the Advantage setup, contact the Advantage Help Line at 965-2334.

Continue on next page for logon procedure
Procedure for logging on to Advantage
