

SIRF: Sustainability Initiatives Revolving Fund

FY 2014 Annual Report

ASI

SIRF provides energy savings opportunities, makes good business sense

The Arizona State University Sustainability Initiatives Revolving Fund (SIRF) invests in large energy conservation and small campus-oriented projects across its four campuses that keep the university at the forefront of sustainability initiatives. ASU is a leader in sustainable practices across its campuses and within academia.

The SIRF mission is to invest in projects that have a direct impact on expanding campus sustainability, energy conservation and renewable-resource development. It is our goal to:

- Invest wisely in projects that promote sustainability
- Accelerate a sustainable campus culture
- Reinvest savings in future energy-savings projects

SIRF seeks projects that address the four overarching goals of the ASU Strategic Plan for Sustainability Practices and Operations:

- Climate neutrality
- Zero solid/water waste
- Active engagement
- Principled practice

SIRF demonstrates that sustainability *should* be and *is* good business. During FY 2014, six student campus-oriented projects were funded.

Since SIRF inception in FY 2010:

- Rebates improved the average internal rate of return to more than 50 percent and contributed \$491,286 to the fund.
- The FY 2015 annual budget includes utility savings of nearly \$1 million for reinvestment in future SIRF-funded projects.
- Through June 30, 2014, SIRF project investments total \$5.6 million. Most projects will repay the fund completely within three to five years from the time of approval.

ARIZONA STA

Arizona State University Sustainability Initiatives Revolving Fund FY 2014 Annual Report

The SIRF revolving fund structure is based on the premise that large investments will result in cash-flow savings to repay the fund within a reasonable period.

Fund Structure

The SIRF funding structure segregates proposed projects by investment size:

Tier 1 – University Community Sustainability Grants

(maximum \$50,000 in grants annually)

Investments are made in small projects to promote engagement and to expand a sustainable campus culture. The maximum individual award is \$5,000. No tangible return on investment is required.

Tier 2 – Fund Matching and Efficiency Loans

(maximum \$500,000 in grants annually)

Investments are medium-scale, capital improvements for space and equipment upgrades and/or renovations to improve energy efficiency. An ASU department is required to invest 50 percent of the required outlay. In return, the department shares in an equivalent portion of the benefits for up to five years; the remaining 50 percent of the net savings is returned to the fund.

Tier 3 – Capital Expansion Loans

(no maximum amount; available funds limit investments)

Investments have a significant and measurable impact on ASU's sustainability profile and provide a return on investment. All investment savings are returned to the fund. Investments may involve strategic partnerships to reduce carbon emissions.

Oversight

SIRF funds are available to all ASU students, faculty and staff through an application process. The Office of Planning and Budget in the ASU Business and Finance organization manages SIRF with oversight from a multidisciplinary review committee. Projects requiring funds in excess of \$100,000 require the Chief Financial Officer's approval.

SIRF investments are thoroughly vetted, and their results are integrated into the university's annual planning process. The Facilities Development and Management Business Operations office validates the Tier 2 and Tier 3 project utility commitments for all ASU campuses. The director of University Sustainability Practices approves all Tier 1 submissions.

A committee of eight ASU senior administrators from the following disciplines provides SIRF oversight:

- Facilities Development and Management
- Financial Services
- Planning and Budget
- University Business Services
- University Sustainability Practices
- W.P. Carey School of Business Department of Economics

TE UNIVERSITY

As of June 30, 2014, the SIRF committee has approved \$5.6 million in investments. This table summarizes those investments.

Tier 1: School of Sustainability Residential Community Upgrades

Rebecca Folk | School of Sustainability Residential Community Advisor

What sparked your project idea?

The project was created to provide an opportunity for School of Sustainability Residential Community (SOSRC) students to practice urban sustainability concepts in their backyard. The \$5,000 grant enabled students to:

- create a container garden to grow herbs and produce
- install rainwater barrels to help water the garden
- set up a clothesline to air dry clothes
- deploy solar-powered lighting in the courtyard.

What are your project goals?

The primary project goal is to teach and immerse the SOSRC residents in the practices of living sustainably in an urban setting. This project provided the administration, faculty and staff of the Julie Ann Wrigley Global Institute of Sustainability and the School of Sustainability the opportunity to engage with students outside the classroom and to share their knowledge of creating a sustainable community.

What excites you the most about your project?

The most exciting part is the "hands on" experience for students. A new student cohort will move in each year and reimagine the space and materials and transform it into their sustainable backyard.

What is your advice to others who have a SIRF project idea?

Involve students in writing a SIRF grant proposal. This exercise provides students an opportunity to take ideas and concepts and craft them into a focused plan and then articulate that plan into a grant proposal. The students involved with the SIRF grant have a better understanding of the steps it takes to put together a proposal.

TIER 1 PROJECTS: University Community Sustainability Grants

School of Sustainability Residential Community Upgrades

Total Investment

Project Name

\$5,000

The School of Sustainability Residential Community (SOSRC) engaged students in the creation and development of the outdoor space in Adelphi Commons on the Tempe campus. The project is intended to teach and immerse SOSRC residents in the practices of living sustainably in an urban setting.

- A new pulley clothesline system allows students to dry their clothes outside, which offsets energy use.
- A student gardening club was created to plant, maintain and harvest garden produce from the new vertical garden.
- To ensure proper sustainable water use, new rainwater barrels capture water, which is used for the garden in conjunction with an irrigation system and hoses.
- Solar outdoor lighting captures solar energy during the day and allows students to relax in the outdoor space at night, which helps create a more livable space and community.

This project will educate and allow students to apply methods learned in the classroom into a living/learning sustainable urban community.

TIER 1 PROJECTS: University Community Sustainability Grants

Project Name

Total Investment

Spatial Tree Database Handheld Device \$5,000

ASU Grounds Services collaborated with ASU faculty and students to collect geospatial data to build a Geographic Information System (GIS) database of plants and signage for the ASU Arboretum.

SIRF funds enabled the purchase of a GPS handheld device that was required to conduct this fieldwork. Students from ASU's GIS and Environmental Humanities programs helped collect and process the data. The students are developing a new campus sustainability tour that will feature an online app and signage. Arboretum team members use the GPS handheld device to tag plant locations.

TIER 1 PROJECTS: University Community Sustainability Grants

Project Name

Total Investment

Water Fountain/Bottle Refill Stations

\$20,000

This project enabled the purchase and installation of water bottle filling stations on the Downtown, Tempe and West campuses. The project goals:

- promote a reusable bottle culture at ASU
- reduce plastic water bottle use
- move ASU towards its Zero Waste goal.

The eleven new water fountains/bottle filling stations are a visual representation of ASU's sustainability commitment and allow students, faculty and staff to fulfill personal sustainability goals.

ASU has the potential to save 183,400 bottles and divert 4,493 pounds

of plastic from landfills per year with current SIRF-funded installations.⁵ ASU refilling station eliminates the use of between 4,0000¹, and 40,0000¹, plastic bottles and diverts between

and

pounds of plastic from

landfills per year

SIRF-funded water bottle filling stations reduce the university's carbon footprint and promote a culture that leads to the use of fewer plastic bottles. The stations:

- support ASU's carbon-neutrality and zero-water-waste goals
- use less power and waste less water than the water fountains and water coolers they replaced
- exceed current energy-efficiency standards
- feature refrigerants with a zero-percent ozone-depletion ratio.

Many of each station's components are made from recycled content, and the majority of them are recyclable.

Notes:

- 1. Depends on filling station location.
- 2. Based on number of 20 oz. bottles reported per currently installed filling station.
- Based on average weight of plastic water bottle reported by http://www.packworld.com/sustainability/recycling/pet-water-bottlesrecycling-grows-while-weight-drops
- 4. 16.9 oz. bottle weighs 9.9 grams, 20 oz. bottle weighs 11.12 grams (extrapolated). 11.12 grams = 0.0245 lbs.
- 5. Includes 2012 SIRF-funded installations.

SIRF and Academia

ASU is a Founding Circle member of the Billion Dollar Green Challenge hosted by the Sustainable Endowments Institute, a special project of Rockefeller Philanthropy Advisors. In collaboration with 15 partner organizations, the institute launched the challenge in October 2011 to drive energy savings with green revolving funds.
