

PLATE I.3

seepage to fissures - fractures - a tritium out crop  
measured in the effluent stream

sub-seabed repositories  
where water leeches in

forty two spent fuel rods (ruptured in transport)  
buried on asphalt pads  
hastily encased  
emplaced

this in turn however deep  
in host rock

in significant decay

de graded solvent absorbed  
cracks between bedding

small equipment  
and process - related debris -  
exposure

to slow  
dripping water  
flaking  
shards

fish

with body anomalies.
