

this is my organisation an organ      they say its a sign  
 about about what      you can still see me yours  
 functioning to maintain the      what does it say where  
 you do when the      till looking and finding a  
 a way one way      use you know that im hea  
 machine bodily pumping is it      words come      does it point from does  
 e hind the curtain you che  
 major can it be transplanted the      from where the      it direct where are you  
 sees space from darkness  
 list is long you will have to wait      page in the form      from being redirected  
 to your senses      where did you begin  
 putting a life dependent      that you were told      might catch you  
 just before you form  
 functioning in you you have      cause this is the  
 under stand under burrow so      before you are and  
 neglected organ sanitation do you      way that they  
 the ground buckles beneath      then I'll see before  
 smoke drink take regular exercise      want to hear it  
 your feat and the flat crumbles      you slip round the  
 reading      cause this is the way      corner glimpse of  
 crumbs bread pigeon park  
 recognition      this is where here is where you should meet here thank you for joining me joining  
 they understand      fabric the everything  
 glancing at the      attaching as you do to here hear now I have your attention a tension you gave it to  
 that they can come in      before it has to be to  
 known reflection      me when you joined when you entered you know really real reach here sense to gain  
 by you coming out      do form to carry  
 do not hide in them come out say it just say it what you mean stop your doing it your is that  
 there exposed depth unknowable currents that may rock but not grip and draw  
 you have to change to cross so      your hand and bashes  
 it is that the word is that what you meant what you in that moment at that point it was is it  
 down as they swirl to where we here are yes  
 the same now repeated on the page its the same is the same but the space and the time it is  
 legs and twists and  
 different cause you said it before in the other place so every time you call to the others to the  
 where nothing is what you are but      tightens and spins  
 other places and you reawaken the chain the places and the moments when it was called to call  
 frustration see there  
 mark dated dot      which you must aim so that you      it is doing it again  
 upon the sea which utters me so how to put you in the word you must know your space and  
 to can be with the words are the      making it whole a  
 collect difference within it so that the others spaces feel unwelcome cause they cant get past  
 way for they are with them they      single not a multiple  
 the door they are not it but then again is it just that you want to see for you need them to  
 understand those that too are caught in the relationing for it is through these chains as they  
 come from them they come from      not the thump cut in  
 cross and combine that they come to you and that is what you need that is why your doing  
 red plastic handle  
 this right for them for whoever is reading this now you must listen      continue crack  
 pavement damp
