from *Deep eco pré*

The following pieces are excerpts from *Deep eco pré*, a collaboration by Tina Darragh and Marcella Durand using Francis Ponge's *Making of the Pre* and Michael Zimmerman's *Contesting Earth's Future: Radical Ecology and Postmodernity*.

status of sides in bedded colors

flat chord in one moment
from where we overlooked the scene, among dry shrubs
a score accompanies, but is not explained
it is companion, a “wider identification”

does ecology reduce the world to a picture and
in a still blue sky one bird
the shape of a sentence cuts across and
introduces a question

whether the ego should be the size of a meadow
and a Deep Ecology Platform, constructed like a fire tower,
the making represents the evolution, the search for formulation,
constructing id, ego and ancient tribal wisdom, reflected in the meadows

discovered in the produce and presentation, if the meadow is a product, or a
presentation, and a word flies across the static, prepared for no prostration,
("to preserve the verticalities") if this meadow is like the larger forest, a sanctuary,
a giant T, prepare, pare, prêt, pres, near to us, presque, presque here,
almost here

and here the picture, paint by numbers, and below
us, preserving verticalities, runs a river (the Lignon)
place as well as pasturage; we can assimilate it
it is presque here, prepared, pared away as we have been prepared
