Arizona State University
ASU Main Campus
FALL 2000 TRANSFER GUIDE
FOR YAVAPAI COMMUNITY COLLEGE
Bachelor of Science in Engineering
Chemical Engineering

Students applying for admission with transferable hours must meet transfer GPA, freshman aptitude, and competency requirements www.asu.edu/admissions/applyingtoasu. Students transferring 24 or more semester hours do not have to meet freshman aptitude requirements. Students who are 22 years of age or older or have completed an Arizona General Education Curriculum (AGEC) or any associate degree or higher do not have to meet competency requirements. A maximum of 64 transferable semester hours completed at a regionally accredited two-year institution may be transferred to ASU. All transferable community college credits are accepted as lower-division credits and do not satisfy upper division General Studies or graduation requirements.

Chemical Engineering occupies a special place among scientific and engineering disciplines. It serves as a bridge between chemistry and engineering and, as such, appeals to students with a strong interest in applying the principles of chemistry to the development of new materials and the design of processes to manufacture these new products. For further information, call or write:

SCHOOL OF ENGINEERING ADMISSION CRITERIA
1. A minimum of 2.50 cumulative GPA is required from community college transfer students.
2. Students whose native language is not English must also submit a TOEFL score of 550 points in addition to meeting the minimum GPA requirements.
3. Transfer students are encouraged to have completed science and math courses applicable to the engineering degree.
4. A preprofessional category of admission is available for applicants deficient in School of Engineering admission requirements.
5. Students admitted to the preprofessional program are restricted to taking lower-division courses. After completing a minimum of 30 semester hours of required or approved elective courses with a cumulative minimum GPA of 2.50, one may apply for admission to the professional program. The cumulative GPA is calculated using all credits from ASU and from all other colleges and universities attended.

Transfer value of a course, including General Studies value, is governed by the Course Applicability System (CAS) in force at the time the course is taken. Summer session is included with the previous academic year. Community college courses which are equivalent in content to upper division courses at ASU will be transferable as equivalent but with lower division credit. The course need not be repeated but will not count toward the required number of upper division credit hours.

GENERAL STUDIES REQUIREMENTS

Students completing the Arizona General Education Curriculum (AGEC) will still be required to fulfill lower division program requirements and prerequisites within their college and major/minor area of study. In all cases, students have the responsibility for selecting general education coursework that is relevant to the requirements of their intended major and degree.

Students in an engineering program must complete 16 hours of Humanities [HU] and Social/Behavioral Sciences [SB] courses. One course must be taken at ASU, as it must be upper division. In your selection of HU and SB credits, two courses must be from the same department (or have the same prefix). Select credits from CAS General Studies Insert as follows: 6 or 7 HU credits, 6 or 7 SB credits (which must include those that transfer as ECN 111 or ECN 112), 3 C credits, 3 G credits, and 3 H credits. It is beneficial for students to select HU or SB courses that concurrently satisfy C, G or H requirements. Additional and/or mandated General Studies requirements, if any, are listed in the Major Requirements section below with designation in brackets, e.g. [CS].

MAJOR REQUIREMENTS

ASU

CHM 113 General Chemistry [SQ]
CHM 116 General Chemistry [SQ]
CHM 331 General Organic Chem &
CHM 335 Gen Organic Chem Lab
CHM 332 General Organic Chem
ECN 111 Macroeconomic Principles [SB]
or
ECN 112 Microeconomic Principles [SB]
MAT 270 Cal/Analytic Geo I [MA]
MAT 271 Cal/Analytic Geo II [MA]
MAT 272 Cal/Analytic Geo III [MA]
MAT 274 Elem Diff Equations [MA]
PHY 121 Univ Physics I:Mech [SQ] &
PHY 122 Univ Physics Lab I [SQ]

YC

CHM 151 General Chemistry I
CHM 152 General Chemistry II
CHM 235 Gen Organic Chemistry I
CHM 235L Gen Organic Chem Lab
CHM 236 Gen Organic Chemistry II
BSA 235 Princ of Econ - Macro
BSA 236 Princ of Econ - Micro
MTH 151 Calc & Analytic Geom I
MTH 152 Calc & Analytic Geom II
MTH 251 Calculus III
MTH 274 Elem Differential Equa
PHY 155 Engineer Physics I * &
PHY 251 Engineer Physics II *

* The YC sequence PHY 155, PHY 251 will be accepted for transfer purposes as equivalent to ASU PHY 121, 122, PHY 131, 132.

ENGINEERING CORE

ASU

ECE 100 Intro Engrg Design [CS]

YC

No YC equivalent

Approved by Marilyn L. Hart
Coordinator, Academic Administration

Date 8/16/00

1. Although a course may satisfy a core area requirement and an awareness area requirement concurrently, a course may not be used to satisfy requirements in two core areas simultaneously. A course may satisfy two awareness areas concurrently.

2. When selecting HU or SB core courses, students must keep in mind that A. two courses from the same department must be taken in either core area; B. courses from at least two departments must be taken. These two conditions may, but need not be satisfied in the same core area. At least one course within the 16 semester hours must be an upper-division course taken only at ASU.
