The Arizona resident applicant for transfer admission must meet competency requirements and have a cumulative grade point average (GPA) of 2.00 on a four-point (A) scale in all college level work and be in good standing and eligible to return to the last institution attended. Students who have less than 24 semester transfer credits must also meet competency requirements. Arizona residents who have completed an Arizona General Education Curriculum (AGEC) or an associate degree with a minimum 2.00 GPA in the AGEC or associate degree are exempt from admission requirements. A maximum of 64 semester credit hours will be accepted when transferred from community colleges; all transferable community college credits are accepted as lower-division credits and do not satisfy upper-division General Studies or graduation requirements.

Civil Engineers are concerned with the impact of their project on the public and the environment, and they attempt to coordinate the needs of society with technical and economic feasibility. For further information, call or write:

SCHOOL OF ENGINEERING ADMISSION CRITERIA
In addition to the University admission requirements, transfer students must also consider the following:
1. A minimum of 2.50 cumulative GPA is required from community college transfer students.
2. International students must also submit a TOEFL score of 550 points in addition to meeting the minimum GPA requirements.
3. Transfer students are encouraged to have completed science and math courses applicable to the engineering degree.
4. A preprofessional category of admission is available for applicants deficient in School of Engineering admission requirements.
5. Students admitted to the preprofessional program are restricted to lower-division courses. After completing a minimum of 30 semester hours of required or approved elective courses with a cumulative GPA equivalent to that required of transfer students, one may apply for admission to the professional program. The cumulative GPA is calculated using all credits from ASU and from all other colleges and universities attended.

ASU
Transfer value of a course, including General Studies value, is governed by the Course Equivalency Guide (CEG) in force at the time the course is taken. Summer session is included with the previous academic year. Community college courses which are equivalent in content to upper division courses at ASU will be transferable as equivalent but with lower division credit. The course need not be repeated but will not count toward the required number of upper division credit hours.

FIRST YEAR COMPOSITION (3-6)
ENG 101 & 102 First-Year Comp
ENG 105 Adv First-Year Comp
ENG 107 & 108 Eng Foreign Students

AWC
No AWC equivalent

GENERAL STUDIES REQUIREMENTS
Students completing the Transfer General Education Core Curriculum (TGECC) will still be required to fulfill lower division program requirements and prerequisites within their college and major/minor area of study. In all cases, students have the responsibility for selecting general education coursework that is relevant to the requirements of their intended major and degree.

Students in an engineering program must complete 16 hours of Humanities [HU] and Social/Behavioral Sciences [SB] courses. One course must be taken at ASU, as it must be upper division. In your selection of HU and SB credits, two courses must be from the same department (or have the same prefix). Select credits from CEG General Studies Insert as follows: 6 or 7 HU credits, 6 or 7 SB credits (which must include those that transfer as ECN 111 or ECN 112), 3 C credits, 3 G credits, and 3 H credits. It is beneficial for students to select HU or SB courses that concurrently satisfy C, G or H requirements. Additional and/or mandated General Studies requirements, if any, are listed in the Major Requirements section below with designation in brackets, e.g. [N3].

Civil Engineering/Environmental Engineering Option

**ASU**

**MAJOR REQUIREMENTS**

- CHM 114 General Chemistry for Engineers [S1/S2]  
  or CHM 113 General Chemistry [S1/S2]  
  and CHM 116 General Chemistry [S1/S2]  
- CHM 231 Elem Org Chem [S1/S2]

  | CHM 151 General Chemistry I
  | CHM 140 Fund Organic Chemistry *
  | * CHM 140 transfers to ASU as CHM 231 and CHM 235.

- ECN 111 Macroeconomic Principles [SB]
  or ECN 112 Microeconomic Principles [SB]

  | ECN 240 Princ of Macroeconomics
  | ECN 250 Princ of Microeconomics

- MAT 270 Cal/Analytic Geo I [N1]
  MAT 271 Cal/Analytic Geo II [N1]
  MAT 272 Cal/Analytic Geo III [N1]

  | MAT 241 Analytic Geom & Calc III
  | MAT 274 Elem Diff Equations [N1]
  | BIO 205 Microbiology

  | PHY 221 General Physics &
  | PHY 222 General Physics

  | PHY 121 Univ Physics I: Mech [S1/S2] &
  | PHY 122 Univ Physics Lab I [S1/S2] &
  | PHY 131 Univ Physics II: Elec and Magnetism [S1/S2] &
  | PHY 132 Univ Physics Lab II [S1/S2]

**ENGINEERING CORE**

- ECE 100 Intro Engrg Design [N3]
- ECE 210 Statics

  | EGR 251 Appl Mech Statics

Approved by Marilyn L. Hart
Coordinator, Academic Administration

1. Although a course may satisfy a core area requirement and an awareness area requirement concurrently, a course may not be used to satisfy requirements in two core areas simultaneously. A course may satisfy two awareness areas concurrently.

2. When selecting HU or SB core courses, students must keep in mind that A. two courses from the same department must be taken in either core area; B. courses from at least two departments must be taken. These two conditions may, but need not be satisfied in the same core area. At least one course within the 16 semester hours must be an upper-division course taken only at ASU.
