F.5 - SUPPLIER SUSTAINABILITY GUIDELINES

ASU Purchasing and Business Services, in conjunction with University Sustainability Practices, has implemented Sustainable Purchasing Guidelines for procuring products and services that support and advance ASU's Sustainability Goals. For the purpose of evaluating Sustainability the following description applies: A process of current or developing business practices and technologies that restore and enhance the environment by supplying products and services that have a lesser or reduced effect on human health and the environment when compared with competing products or services that serve the same purpose. This comparison may consider raw materials acquisition, production, manufacturing, packaging, distribution, reuse, operation, maintenance or disposal of the product or service. The Supplier Sustainability Questionnaire is used to help ASU understand how sustainable a supplier is. Sustainability is an important goal for the university, and as such, we expect our suppliers to help us support this goal.

**F.6 - SERVICE PROVIDER ACKNOWLEDGEMENT**

All service providers are required to read and sign the ASU Service Provider Agreement prior to performing work that may involve disturbing of any surface materials on ASU property. Failure on the part of the service provider to comply with these requirements may result in termination of the contract with ASU.

Arizona State University is committed to protecting the health and welfare of students, faculty, staff, visitors, and to the environment. Accordingly, it is important that all members of the ASU community recognize and share this commitment and comply with the environmental, health and safety policies, rules, procedures and regulations governing ASU campus activities.

ASU is also looking to the community, including service providers, for cooperative and responsible leadership that will help the University implement a safer environment through safer practices and more sustainable solutions.

Towards this end, it is ASU’s expectation that all service providers have the responsibility for environmental, health, and safety issues created or otherwise arising from or related to their work under their contract with ASU.

The service provider shall ensure that its employees are properly identified (e.g. officially issued picture ID and/or badge) and have been instructed about the boundaries of their work areas. Service providers will comply with all applicable local, state, and federal rules and regulations, including those related to the Occupational Safety and Health Act of 1970.

For all service providers, ASU is providing a few general guidelines in this document concerning conducting work on ASU Job Sites.

DISCLOSURE OF ASBESTOS, LEAD AND/OR OTHER HAZARDOUS MATERIALS

Arizona State University is informing all service providers of the potential presence of asbestos, lead and/or other hazardous materials at ASU. Depending on the location(s) of your work, there may be one or more of these materials present. It is your responsibility to discuss the full scope of your work with the CPMG Project Manager or designee so that you have the appropriate information related to asbestos, lead and/or other potentially hazardous materials. If the scope of your work changes, contact your CPMG Project Manager or designee before proceeding to determine if the change in scope may involve the potential disturbance of asbestos, lead and/or other hazardous materials.

Should there be changes to your scope of work affecting areas outside of your original contract area, or, if unforeseen or unidentified suspect materials be uncovered or discovered during your work, you are required to stop all work which would impact those materials until they can be evaluated and tested by ASU. Immediately upon discovery of any unidentified or unforeseen building material, you must notify the CPMG Project Manager to arrange for ASU to evaluate and test the materials.

Prior to your work taking place, inspections for asbestos, lead and other potentially hazardous materials must be (or have been) conducted by ASU, and identified materials (containing asbestos, lead or other hazardous materials) that would be disturbed by your current scope of work will be (or have been) removed or isolated in such a manner as to prevent potential exposure. Please contact ASU CPMG Asbestos Program Manager at 480-965-7739 to determine if, based on your current scope of work, there any remaining materials which are or may be present in adjacent location(s), but should not be disturbed.

Your signature on this document acknowledges you received this disclosure and that you had the opportunity to review your scope of work with the CPMG Project Manager or designee.

The Service Provider Job-Site Safety Information Orientation document is meant to serve as a guide for the contractor/vendor, any and all of its supervisors, and any and all of its subcontractors during their performance within the scope of work under their contract with ASU. Although the document sets forth certain guidelines and rules of operations on ASU sites, it is not intended to address every potential safety and health issue that may arise during the scope of the contracted work. IT DOES NOT COVER EVERY POSSIBLE SITUATION.

While ASU retains the right to periodically review the work of any service provider, its supervisors, or its subcontractors, ASU does not assume responsibility for any issues identified outside of contract compliance.

Accordingly, ASU expects each service provider to supplement the provisions contained in the
Service Provider Job-Site Information & Guideline document with proper instructions and work practices that, based on knowledge and experience, will help decrease the likelihood of injury to service provider employees, subcontractors’ employees, and to others, as well and prevent damage to property and material on ASU sites.

ATTACHMENT G – FREQUENTLY ASKED QUESTIONS (FAQ)

The following is a list of the most frequently asked questions regarding the Annual Request for Qualifications. If any questions remain unanswered, please email Construction@asu.edu

1. Q: My firm already has an open-end agreement with the ASU. Is it necessary that we respond to the 2019 ARFQ?
   A: **YES.** No new work will be issued under the previous open-end agreement version(s). If your firm would like to be considered for new projects, you **must** respond to the 2019 ARQ.

2. Q: Our firm submitted ARFQ qualifications, but we have not received an open-end agreement yet?
   A: Submitting qualifications does not guarantee that a firm will receive the open-end agreement. Your firm will not receive an open-end agreement until it is selected for a project. The open-end agreement will only be issued once and will remain valid for the length of the ARQ period.

3. Q: My firm responded to the ARFQ this year. Can you tell me its status?
   A: Consultants will be notified via email that their submittal was approved by Purchasing. If you have not been notified within 30 days after submitting your qualifications, please contact Construction@asu.edu.

4. Q: My firm has already responded to the ARFQ for one of the other state universities. Do we need submit our qualifications to ASU separately?
   A: Yes. Although the ARFQ is similar in form for each university, there are some differences so Consultants must submit qualifications to each university.

5. Q: My firm has a current ARFQ on file with ASU. Today we heard about a project at ASU. Why weren’t we notified of this project?
   A: Submittal of an ARFQ does **not** mean a firm will be notified of upcoming ASU projects.

6. Q: My firm submitted an ARFQ this year. We have since added two new disciplines with Arizona registrations. Do we need to notify the University and, if so, how?
   A: Consultant ARFQ submittals can be revised at any time. Consultant is responsible to keep your company information current. Refer to Section IV - How to Submit.
